## SS22 OPTICAL COLLECTION

Inspired by the Mediterranean coast, the playful, fun, and elegant Sandro Spring/Summer 22 optical eyewear collection speaks of the brand's youthful spirit and distinguished French attitude. With a free heart, the latest optical capsule captures the essence of both the Sandro Women's and Sandro Men's SS22 ready-to-wear collections. A perfect balance between effortless nonchalance and uncalculated presence, the new season is inspired by a thirst for life.

## SANDRO FEMME

Embodying charming Parisian chic, women's metal style SD4025 is a contemporary frame perfect for the forthcoming Spring/Summer 22 season. The squared front features an exclusive vintage-inspired textured bamboo wire rim, embellishing the brow for a contemporary spin. The Shiny Gold version paired with Black accents and temple tips is both a contemporary yet classic choice.

For the style-savvy female, the chunky panto shape of SD2033 is a classic frame designed with elegance in mind. The chunky silhouette is perfectly balanced by shiny, slim metal temples featuring bevelled end pieces. For an added touch of luxe this style features titanium nose pads and is available in a new milky dark Crystal Green colourway.

The iconic "flame" temple, a design element which made its mark in previous Sandro eyewear collections, features once again in this latest SS22 optical collection. This signature detail, inspired by the iconic Sandro flame sneakers, is seen on SD2035 - a stunning acetate and metal combination style. This model also showcases a vintage TV screen-inspired front crafted from acetate, extending into elegant "flame" shaped metal temples. Available in a warm Vintage Tortoiseshell option, this style is for the Sandro woman who longs for escape and sunshine and travel.

## SANDRO HOMME

Crafted from thick bevelled acetate, men's style SD1035 is a classic and refined choice. With an abundance of retro appeal, this frame features a timeless keyhole bridge as well as a new pin metal signature studded on the outer temples. It is available in minimalist and functional colour options such as a classic Black/Tortoiseshell.

For a timeless optical style this season, SD3014 is the ultimate fit. This metal frame features a rounded front with a classic thin rim wire construction, fitted with a metal sheet nose bridge. Luxury titanium nose pads also feature and it is available in an array of stylish colour options such as shiny Brushed Gold.
